ANIKET BHAVSAR
SOFTWARE ENGINEER

PROFILE

I am a Software Engineer with 4+ years of experience with front-end/back-end frameworks (**React, Remix-SSR,** and **Angular Version-2+**) with **Node** and **GraphQL and AWS cloud services**. I am also passionate about building an excellent **web application** that improves the lives of those around me with assistance from **cutting-edge** technology.

EDUCATION

University of Maryland Baltimore County
AUGUST 2014 - MAY 2016
Master of Science in Information System

University of Mumabi
JUN 2009 - JAN 2012
Bachelor In Computer Science

EXPERIENCE

Priceline.com, Agile Software Engineer II
2022- PRESENTLY

- Working with advanced web technologies like **Remix JS (SSR) framework**, **Typescript**, **React**, **Node**, **ExpressJS**, **GraphQL**, **React testing library**, **Jest**, and **AWS Services**.
- Develop internal applications of Priceline organization likes, Help page, Cares-refund activities, and new Customer Care Support application.
- Validating customer support interface requirements and implementing in Priceline design system (**Styled Components**).
- **Managing** and **Mentoring** junior **team members** for task distribution and mentoring team members on daily tasks.
- Implementing **Remix JS server-side** rendering framework with different **remix hooks** along with **React** functional **components**, **context API**, and **React Hooks**.
- Integrating with **React-testing library Jest unit test cases** with **Mock service worker** for **unit testing functionality**.
- Handling **AWS Services** like **lambda** along with **API Gateway** for customer support API execution.
- Working knowledge of different types of **AWS** services like **EC2**, **API gateway**, **S3 Bucket**, **Cloud Front**, and **Lambda**.
- Understanding of **continuous integration** and **continuous delivery** pipeline using **AWS** code **commit**, **code build**, and **code deployed** services.

Here Technologies, Software Engineer II.
2020 - 2022

- Working on different **in-house products** for developing maps by annotated signs, poles, and lane marking which are implemented using technology in **React** and **Redux technology**.
- Hands-on experience in creating react Class as well as **functional components** using **React JS** and passing data between **props** and **state**.
- Hands-on experience in creating **react Class** as well as **functional components** using React JS and passing data between **props** and **state**.
- Good understanding of **react-lifecycle** methods and **Redux state management**.
- React **hooks** and implementation. **Axios, Redux-saga,** and **Redux-thunk packages**.
- Involved in implementation of **RESTFUL** web service **APIs using Node.js,** which were consumed by making **AJAX calls and JSON** as data exchanging tools.
- Built backend service using **NodeJS**, **MongoDB**, and **GraphQL** independently..

Accion Labs , Software Developer.
2019 - 2020

- Worked closely with internal development, product management, and **design teams.**
- Working on different technology in **React, Firebase**, **MongoDB**, and **GraphQL**.
- Translate design **mock-ups** and **wireframes** into **React** components, using **HTML**, and **CSS**.
- Hands-on experience **Redux state** management for components data flow using **HOC** and **Context API**.
- Been an active team player, helped in **fixing bugs**, and carried out troubleshooting.

GEP private Solution , Software Engineer.
2017 - 2019

- Worked on **React** as well as **Angular** applications using **Typescripts**.
- Implementation of **Angular JS** with help of **Typescript** and **Javascript** for the legacy applications.
- Created WCF REST Services and used different bindings to make them available to diverse types of clients.
- Developed REST API Services for accessing data from backend SQL Database Server.
- Having knowledge of witting **unit test** cases, **dev sanity**, **smoke test,** and regression testing of the different **environments.**
- Having experience with angular **unit-testing jasmine** and **karma** for the Front-End application.
- Worked to resolve issues and take corrective actions to ensure user expectations were met.
